Bugdom 720P Playing SmoothlyI havent done extensive tests but I remember 720p playing smoothly (not sure if on VLC or CorePlayer).. Bugdom Mac ROM AndAll OS9 apps will work without a hitch if you stick to a card that has 3D acceleration in OS9 (I flashed a 9700Pro with a Mac ROM and it lacks acceleration in OS9 but absolutely flies under OS X).. Bugdom Mac G4S MirrorAs the title says, just bought 2 Powermac G4s mirror doors A dual 1.. Can these run leopard ok Ill prob max out the ram and buy a fast agp vid card Retro gaming options are wide open as the 867 will natively boot OS9 (and the dual 1.

Thorax now rules the kingdom with an iron fist, and the ladybugs have been imprisoned in spider web cages scattered across the environment.. With some slight optimizations, specifically on the DP 867MHz MDD, it should run just fine with a decent GPU, maxed out RAM and a reliable, fast hard drive or even solid state drive.. Is there anything really cool I can do with these Looking at Retro gaming like Baldurs gate and return to Castle Wolfenstein.

bugdom 2

25ghz and a dual 867 MHz Since it runs OS9 and TigerLeopard very well its an all around great machine, both for modern style usage and for retro style usage.

bugdom 3

Sam will usually make you prove your worthiness before he will help you, but Sally is just interested in gathering acorns, so be sure to brings lots of those to her.. Last time I installed OS 9 was on a Sawtooth G4 that was heavily upgraded, and even then I was running 10.. Additionally, the same Buddy Bugs that helped Rollie McFly defeat King Thorax will help you defeat most mean enemy bugs that you encounter.. If youre planning on loading out all the slots on the logicboard you may wish to seek additional cooling.. 1 and later 10 2 as the primary OS For a better experience, please enable JavaScript in your browser before proceeding.. Be sure to replace the thermal paste on both CPUs and replace the fans with something less noisy - I did exactly that because I was waking up my family with this little.. 25 can be convinced if you want it to) Maybe some classic Duke Nukem 3D, Tomb Raider II, Nanosaur, Bugdom, Quake, Doom, A-10 Cuba, FA 18 Hornet, MDK, Oni, Halo, Unreal, UT, Warcraft II, Driver, 4x4 Evolution, whatever floats yer boat.. Ive ran Leopard on less just fine, and it shouldnt impact gaming much But as said, you could also install Tiger or OS 9, depending on what games you want to play and what they require.. The stock GeForce4 isnt too bad either but it doesnt have Core Image which is pretty much crucial to run Leopard at acceptable speeds.. Theyll both run Leopard (1GB RAM or more recommended), but youd find Tiger better suited to the hardware.
